Surat, Gujarat, India

M.Des Interaction Design student at Dhirubhai Ambani University. I like understanding the people and stories behind everyday experiences. Open to UX/UI and interaction design roles.

PROJECTS

Little Bloom ·Parenting app for first-time parents — Apr 2026 · 2 weeks

Solo: research, UX and UI · M.Des project, guided by Prof. Suraj Joshi

- Surveyed 18 parents of children aged 0–5 and held six one-to-one interviews with first-time parents.
- Rewrote the problem statement after 11 of 18 respondents turned out to live in joint families and still felt unsure about everyday care.
- Found that choosing age-appropriate activities had the lowest confidence (6 of 18 not confident), and built the Community feature around doing activities together.
- Designed playdates that go ahead only once 3 parents join, with the rule shown on every card, in the join sheet and in both outcomes.
- Built the Onboarding → Home and Community flows in Figma with reusable components and colour variables in light and dark modes, and fixed contrast issues.

Indroda Nature Park ·Wayfinding field study — Jan–Feb 2026

Solo researcher · M.Des research module · Gandhinagar

- Planned and ran three field visits combining observation, contextual inquiry, conversations with visitors and photo documentation.
- Synthesised findings into an empathy map labelled heard, observed and inferred, six insights and a “how might we” problem definition.
- Framed navigation failure as a system problem, not a visitor problem, and proposed five wayfinding directions, from entry orientation to complete junction boards.

Rivers of Gujarat ·Interactive data-visualisation website — M.Des project

Solo: design, data and front-end build · guided by Dr. Anupam Rana · 202514104.github.io/Rivers-of-Gujarat

- Compiled data on 185 rivers, 802 dams and polluted river stretches from the Central Water Commission, India-WRIS, CPCB and Government of Gujarat sources.
- Structured it into a five-chapter scrolling story: a district map, major rivers drawn to scale, 47 rivers regrouped by origin, direction and flow, dam records and a pollution overview by BOD level.
- Built and published the site in HTML, CSS and JavaScript with AI-assisted coding, including keyboard access and reduced-motion support.

EDUCATION

M.Des, Interaction Design (IUxD) ·Dhirubhai Ambani University, Gandhinagar — 2025 – present

CPI 8.0

Bachelor of Arts ·Jai Narain Vyas University, Jodhpur — 2021 – 2023

English Literature, Sociology, Public Administration

Higher Secondary and Secondary ·C.S. Vidya Bharti School, Surat — 2014 · 2012

EXPERIENCE

Private tutor ·Mathematics and Science, classes 7–10 — 2016 – 2025

- Taught mathematics and science to students in classes 7 to 10 over nine years.

SKILLS

Research	Field observation, contextual inquiry, surveys, interviews, empathy mapping, synthesis, problem framing
Design	Information architecture, user flows, wireframing, prototyping, UI design, design systems, data visualisation, accessibility
Tools	Figma, FigJam, Framer, Photoshop, Canva ·HTML, CSS, JavaScript (AI-assisted)
